

PARTNER IN
YOUR AUTOMATION
PROJECTS

SINCE 1979

INDUSTRIAL AUTOMATION & EV CHARGING INFRASTRUCTURES

PANEL BUILDER

- Manufacturing of control panels and industrial automation equipment
- Expertise in key sectors: *energy, agri-food, manufacturing, mining, and transport electrification*
- Optimized manufacturing based on Lean principles
- Quality certifications: ISO 9001, CSA, UL, CE, BNQ
- Complete project management: from design to commissioning

ENGINEERING

- Custom panel design
- Control automation and instrumentation
- Electrical schematics, PLC programming, HMI interfaces, and industrial networks
- Factory Acceptance Testing (FAT) and on-site testing support (SAT)
- Maintenance, troubleshooting, and continuous optimization of existing installations

DISTRIBUTION

- Over 10,000 automation and electrical control products in stock
- Technical support at every stage: selection, integration, and commissioning of components

Our essentials :

- Fuses • Circuit breakers • PLCs
- Drives • Contactors • Enclosures
- Servomotors • Sensors • Collaborative robots
- Charging stations

PROGRAMMING

- PLC programming and process optimization
- SCADA solutions & industrial data management
- Programming languages compliant with IEC 61131-3 standard
- *Ladder Diagram* • *Structured Text*
- *Function Block* • *GRAFSET*
